Art Unit: 1615

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Claims 25-27 are rejected under 35 U.S.C. 102(e) as being anticipated by On US 6,319,514 B1. See column 3, lines 48-67, column 4, lines 8-48. The reference clearly shows a two component composition wherein the active agents would be ibuprofen and domperidone. One skilled in the art would immediately envision using conventional carrier materials and granulating agents to form granules for oral administration. See column 4, lines 24-35, claim 48.

Claims 28-40 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 1615

Claims 1-24 have been canceled.
